Simplified Transit Map

Louisville's TARC bus system is a complex network with dozens of routes and thousands of stops.

This map is intended to simplify the system to encourage more riders to use the service.

By removing exact route detail and only presenting popular destinations, the necessary routes one must take become much clearer.

This simplified map allows you to quickly identify which bus you need to get from one area to another.

Places which appear as "stations" on this map may actually be areas which require a few blocks of walking to make connections.

This map is not sanctioned or endorsed by TARC and should be used only for casual reference.

Please consult official TARC maps for exact locations of bus stops, routes and schedules.

Visit www.ridetarc.org.
